Résumé

Are they programming languages? Yes, but...
Are they modeling languages? Well, cannot disagree...
Are they really synchronous? MMhhh, what about the bananas?
What is time in synchrony? It's not time!
Is it simple? It can be
Is it powerful? It can be
What about crowd-correcting? It's all crowdless
Crowd-cleaning? Semantics, semantics, semantics,
Crowd-debugging? semantics, and more semantics
